This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Winton Diversified Fund (UCITS)

Share Class: US\$ I Shares (ISIN: IE00BYWTYX35)

a sub fund of Winton UCITS Funds ICAV (the "Fund"). The Fund is managed by Winton Fund Management Ireland DAC.

Objectives & Investment Policy

The investment objective of the Fund is to seek to achieve long-term investment growth.

To achieve its objective, the Fund invests in a diversified portfolio of financial contracts (derivatives) that provide a return linked to the performance of certain share indices, shares, tradeable debt (bonds), interest rates and currencies. The use of derivatives also allows the Fund to benefit from the decline in the value of such assets (short positions).

The Fund also invests in products known as 'structured financial instruments', a form of investment that provides a return linked to the performance of certain commodity markets.

The Fund's investments are determined according to a combination of quantitative investment strategies that are developed by the Investment Manager, Winton Capital Management Limited following a process that is based on statistical analysis of historical data.

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund. The Fund is not managed in reference to a benchmark.

No income will be paid on your investment.

You may sell your investment on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 5 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund will enter into various derivatives with another party. There is a risk that the other party will become insolvent or fail to make its payments which may result in the Fund and your investment suffering a loss.

Derivatives create leveraged exposure to underlying assets and may therefore lead to significant losses. The Fund will gain exposure to the performance of certain commodity markets. Commodities can have volatile values and prices can be influenced by political and government stability in commodity producing nations.

The performance of the Fund is reliant on the Investment Manager's investment strategies, which may produce inaccurate forecasts.

The investment strategies are implemented using proprietary computer programs, which are subject to the risk of technological failures and human error and may lead to losses to the Fund.

The value of the Fund's investments can change quickly and substantially (can be volatile) and may result in significant losses.

The Fund is not guaranteed and your investment is at risk. You may lose some or all of your investment.

The Fund's investments may be denominated in a currency other than the currency of the shares in the Fund or of the country in which you live. Currency fluctuations may affect the value of your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
