

Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Winton Trend Enhanced Global Equity (UCITS) Share Class: CHF I Shares (ISIN: IE0008QC6PP3)

A sub fund of Winton UCITS Funds ICAV (the "Fund"). The Fund is manufactured and managed by Winton Fund Management Ireland DAC.

PRIPs Manufacturer: Winton Fund Management Ireland DAC

Website: www.wintonucits.com; Telephone: +44(0)20 8576 5800

The Central Bank of Ireland is responsible for supervising Winton Fund Management Ireland DAC in relation to this Key Information Document ("KID").

This PRIIP is authorised in Ireland.

Winton Fund Management Ireland DAC is authorised in Ireland and regulated by the Central Bank of Ireland.

This document was last updated on 17/07/2026.

What is this Product?

Type

The Fund is a sub-fund of Winton UCITS Funds ICAV, an umbrella open-ended Irish collective asset-management vehicle authorised by the Central Bank of Ireland as a UCITS, and this KID describes the share class above and the Fund.

The Share Class is accumulating, meaning that any income generated by the Fund is reinvested.

The base currency of the Fund is USD and the currency of the Share Class is CHF. For Share Classes denominated in currencies other than USD, the Fund will use financial derivatives to the extent reasonably possible to protect the Share Class against currency fluctuations to the USD. For Share Classes designated as 'Unhedged', the Fund will not attempt to protect the Shares Class against currency fluctuations to the USD.

Investment Objective and Policy

The investment objective of the Fund is to seek to achieve long term investment growth.

To achieve its objective, the Fund invests in a diversified portfolio of financial contracts (derivatives) that provide a return linked to the performance of certain share indices, tradeable debt (bonds), interest rates and currencies. The use of derivatives also allows the Fund to benefit from the decline in the value of such assets (short positions).

The Fund also invests in products known as 'structured financial instruments', a form of investment that provides a return linked to the performance of certain commodity markets.

The Fund's investments are determined according to a systematic trend-following strategy developed by Winton Capital Management Limited following a process that is based on statistical analysis of historical data.

The Fund will maintain a long bias exposure to global equity markets relative to the other asset classes.

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund.

The Fund is not managed in reference to a benchmark.

No income will be paid on your investment.

You may sell your investment on a daily basis.

Intended investor

The Fund is intended for sophisticated retail and institutional investors

Term

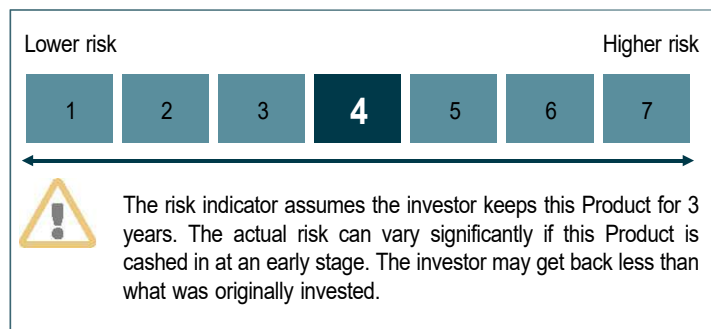

The Fund has no maturity date.

The Fund can be terminated if the net asset value is below USD 20 million or if a change in the economic or political situation would justify such liquidation if necessary in the interests of the shareholders.

Depository: The Bank of New York Mellon SA/NV, Dublin Branch

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. The risk category is not guaranteed and may change over time.

This product has been classified as 4 out of 7, which is a medium risk class.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus available at <https://www.wintonucits.com>.

For share classes designated as 'Unhedged': Be aware of currency risk. You will receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance Scenarios

The figures shown include all the costs of the product itself but may not include costs payable to an advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect the return of the investment.

Future market performance will determine the return from this product. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown in the table below are illustrations using the worst, average, and best performance of the product and/or the suitable benchmark/proxy over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 3 years Investment of 10,000 CHF		If you exit after 1 year	If you exit after 3 years
Stress Scenario	What you might get back	4,756 CHF	4,631 CHF
	Average Return each year	-52.44 %	-22.63 %
Unfavourable Scenario	What you might get back	7,825 CHF	11,874 CHF
	Average Return each year	-21.75 %	5.89 %
Moderate Scenario	What you might get back	11,664 CHF	17,233 CHF
	Average Return each year	16.64 %	19.89 %
Favourable Scenario	What you might get back	17,088 CHF	24,349 CHF
	Average Return each year	70.87 %	34.53 %

The stress scenario shows what an investor might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/03/2017 and 31/03/2020.

Moderate scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/01/2021 and 31/01/2024.

Favourable scenario: This type of scenario occurred for an investment in the product and/or suitable benchmark/proxy between 31/12/2018 and 31/12/2021.

What happens if Winton Fund Management Ireland DAC is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary. In the event of the insolvency of Winton Fund Management Ireland DAC, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. As a shareholder in the Fund, there is no investor compensation or guarantee scheme applies to an investment in the Fund.

What are the costs

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that, in the first year, you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the 'moderate' scenario.

Recommended Holding Period: 3 years Investment of 10,000 CHF		If you exit after 1 year	If you exit after 3 years
Total Costs		162 CHF	682 CHF
Annual cost impact % *		1.6 %	1.5 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 21.37 % before costs and 19.89% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	No subscription fee applies.	0 CHF
Exit costs	No redemption fee applies.	0 CHF
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.10% of the value of your investment per year. This is an estimate based on actual costs over the last year.	110 CHF
Transaction costs	0.52% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	52 CHF
Incidental costs taken under specific conditions		
Performance Fees	No performance fee applies.	0 CHF

How long should I hold it and can I take my money out early?

There is no recommended minimum holding period for this Fund but investors should not view this as a short term investment. However, you can redeem your investment without penalty at any time in accordance with the Fund's prospectus.

How can I complain?

Winton Trend Enhanced Global Equity (UCITS) Share Class: EUR I Shares (Unhedged) (ISIN: IE0006WYEJ29)

A sub fund of Winton UCITS Funds ICAV (the "Fund"). The Fund is manufactured and managed by Winton Fund Management Ireland DAC.

PRIPs Manufacturer: Winton Fund Management Ireland DAC

Website: www.wintonucits.com; Telephone: +44(0)20 8576 5800

The Central Bank of Ireland is responsible for supervising Winton Fund Management Ireland DAC in relation to this Key Information Document ("KID").

This PRIIP is authorised in Ireland.

Winton Fund Management Ireland DAC is authorised in Ireland and regulated by the Central Bank of Ireland.

This document was last updated on 17/07/2026.

What is this Product?

Type

The Fund is a sub-fund of Winton UCITS Funds ICAV, an umbrella open-ended Irish collective asset-management vehicle authorised by the Central Bank of Ireland as a UCITS, and this KID describes the share class above and the Fund.

The Share Class is accumulating, meaning that any income generated by the Fund is reinvested.

The base currency of the Fund is USD and the currency of the Share Class is EUR.

For Share Classes denominated in currencies other than USD, the Fund will use financial derivatives to the extent reasonably possible to protect the Share Class against currency fluctuations to the USD. For Share Classes designated as 'Unhedged', the Fund will not attempt to protect the Shares Class against currency fluctuations to the USD.

Investment Objective and Policy

The investment objective of the Fund is to seek to achieve long term investment growth.

To achieve its objective, the Fund invests in a diversified portfolio of financial contracts (derivatives) that provide a return linked to the performance of certain share indices, tradeable debt (bonds), interest rates and currencies. The use of derivatives also allows the Fund to benefit from the decline in the value of such assets (short positions).

The Fund also invests in products known as 'structured financial instruments', a form of investment that provides a return linked to the performance of certain commodity markets.

The Fund's investments are determined according to a systematic trend-following strategy developed by Winton Capital Management Limited following a process that is based on statistical analysis of historical data.

The Fund will maintain a long bias exposure to global equity markets relative to the other asset classes.

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund.

The Fund is not managed in reference to a benchmark.

No income will be paid on your investment.

You may sell your investment on a daily basis.

Intended investor

The Fund is intended for sophisticated retail and institutional investors

Term

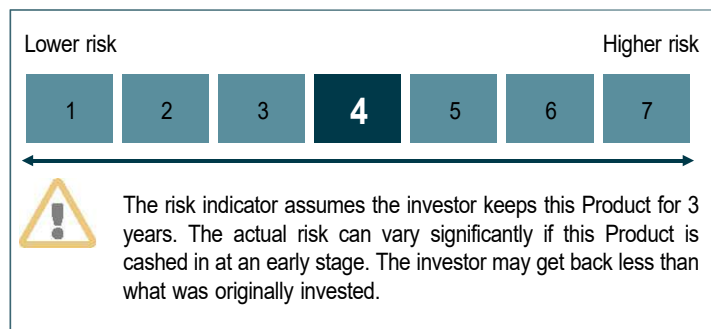

The Fund has no maturity date.

The Fund can be terminated if the net asset value is below USD 20 million or if a change in the economic or political situation would justify such liquidation if necessary in the interests of the shareholders.

Depository: The Bank of New York Mellon SA/NV, Dublin Branch

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. The risk category is not guaranteed and may change over time.

This product has been classified as 4 out of 7, which is a medium risk class.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus available at <https://www.wintonucits.com>.

For share classes designated as 'Unhedged': Be aware of currency risk. You will receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance Scenarios

The figures shown include all the costs of the product itself but may not include costs payable to an advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect the return of the investment.

Future market performance will determine the return from this product. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown in the table below are illustrations using the worst, average, and best performance of the product and/or the suitable benchmark/proxy over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 3 years		Investment of 10,000 EUR	
		If you exit after 1 year	If you exit after 3 years
Stress Scenario	What you might get back	4,752 EUR	4,630 EUR
	Average Return each year	-52.48 %	-22.64 %
Unfavourable Scenario	What you might get back	7,825 EUR	11,874 EUR
	Average Return each year	-21.75 %	5.89 %
Moderate Scenario	What you might get back	11,646 EUR	17,219 EUR
	Average Return each year	16.46 %	19.86 %
Favourable Scenario	What you might get back	17,088 EUR	24,349 EUR
	Average Return each year	70.87 %	34.53 %

The stress scenario shows what an investor might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/03/2017 and 31/03/2020.

Moderate scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/01/2021 and 31/01/2024.

Favourable scenario: This type of scenario occurred for an investment in the product and/or suitable benchmark/proxy between 31/12/2018 and 31/12/2021.

What happens if Winton Fund Management Ireland DAC is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary. In the event of the insolvency of Winton Fund Management Ireland DAC, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. As a shareholder in the Fund, there is no investor compensation or guarantee scheme applies to an investment in the Fund.

What are the costs

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that, in the first year, you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the 'moderate' scenario.

Recommended Holding Period: 3 years Investment of 10,000 EUR		If you exit after 1 year	If you exit after 3 years
Total Costs		162 EUR	682 EUR
Annual cost impact % *		1.6 %	1.5 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 21.37 % before costs and 19.86% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	No subscription fee applies.	0 EUR
Exit costs	No redemption fee applies.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.10% of the value of your investment per year. This is an estimate based on actual costs over the last year.	110 EUR
Transaction costs	0.52% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	52 EUR
Incidental costs taken under specific conditions		
Performance Fees	No performance fee applies.	0 EUR

How long should I hold it and can I take my money out early?

There is no recommended minimum holding period for this Fund but investors should not view this as a short term investment. However, you can redeem your investment without penalty at any time in accordance with the Fund's prospectus.

The figures shown include all the costs of the product itself but may not include costs payable to an advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect the return of the investment.

Future market performance will determine the return from this product. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown in the table below are illustrations using the worst, average, and best performance of the product and/or the suitable benchmark/proxy over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 3 years		If you exit after 1 year	If you exit after 3 years
Investment of 10,000 EUR			
Stress Scenario	What you might get back	4,756 EUR	4,631 EUR
	Average Return each year	-52.44 %	-22.63 %
Unfavourable Scenario	What you might get back	7,825 EUR	11,874 EUR
	Average Return each year	-21.75 %	5.89 %
Moderate Scenario	What you might get back	11,664 EUR	17,351 EUR
	Average Return each year	16.64 %	20.16 %
Favourable Scenario	What you might get back	17,088 EUR	24,349 EUR
	Average Return each year	70.87 %	34.53 %

The stress scenario shows what an investor might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/03/2017 and 31/03/2020.

Moderate scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/10/2022 and 31/10/2025.

Favourable scenario: This type of scenario occurred for an investment in the product and/or suitable benchmark/proxy between 31/12/2018 and 31/12/2021.

What happens if Winton Fund Management Ireland DAC is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary. In the event of the insolvency of Winton Fund Management Ireland DAC, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. As a shareholder in the Fund, there is no investor compensation or guarantee scheme applies to an investment in the Fund.

What are the costs

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that, in the first year, you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the 'moderate' scenario.

Recommended Holding Period: 3 years Investment of 10,000 EUR		If you exit after 1 year	If you exit after 3 years
Total Costs		162 EUR	612 EUR
Annual cost impact % *		1.6 %	1.2 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 21.37 % before costs and 20.16% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	No subscription fee applies.	0 EUR
Exit costs	No redemption fee applies.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.10% of the value of your investment per year. This is an estimate based on actual costs over the last year.	110 EUR
Transaction costs	0.52% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	52 EUR
Incidental costs taken under specific conditions		
Performance Fees	No performance fee applies.	0 EUR

How long should I hold it and can I take my money out early?

There is no recommended minimum holding period for this Fund but investors should not view this as a short term investment. However, you can redeem your investment without penalty at any time in accordance with the Fund's prospectus.

The unfavourable, moderate, and favourable scenarios shown in the table below are illustrations using the worst, average, and best performance of the product and/or the suitable benchmark/proxy over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 3 years		Investment of 10,000 EUR	
		If you exit after 1 year	If you exit after 3 years
Stress Scenario	What you might get back	4,756 EUR	4,631 EUR
	Average Return each year	-52.44 %	-22.63 %
Unfavourable Scenario	What you might get back	7,825 EUR	11,874 EUR
	Average Return each year	-21.75 %	5.89 %
Moderate Scenario	What you might get back	11,664 EUR	17,433 EUR
	Average Return each year	16.64 %	20.35 %
Favourable Scenario	What you might get back	17,088 EUR	24,349 EUR
	Average Return each year	70.87 %	34.53 %

The stress scenario shows what an investor might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/03/2017 and 31/03/2020.

Moderate scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/10/2022 and 31/10/2025.

Favourable scenario: This type of scenario occurred for an investment in the product and/or suitable benchmark/proxy between 31/12/2018 and 31/12/2021.

What happens if Winton Fund Management Ireland DAC is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary. In the event of the insolvency of Winton Fund Management Ireland DAC, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. As a shareholder in the Fund, there is no investor compensation or guarantee scheme applies to an investment in the Fund.

What are the costs

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that, in the first year, you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the 'moderate' scenario.

Recommended Holding Period: 3 years Investment of 10,000 EUR		If you exit after 1 year	If you exit after 3 years
Total Costs		249 EUR	942 EUR
Annual cost impact % *		2.5 %	1.5 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 21.85 % before costs and 20.35% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	No subscription fee applies.	0 EUR
Exit costs	No redemption fee applies.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.97% of the value of your investment per year.	197 EUR
Transaction costs	0.52% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	52 EUR
Incidental costs taken under specific conditions		
Performance Fees	No performance fee applies.	0 EUR

How long should I hold it and can I take my money out early?

There is no recommended minimum holding period for this Fund but investors should not view this as a short term investment. However, you can redeem your investment without penalty at any time in accordance with the Fund's prospectus.

How can I complain?

Please contact the management company with any questions, comments or complaints by telephone, email or post:

Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Winton Trend Enhanced Global Equity (UCITS) Share Class: EUR I-P Shares (Unhedged) (ISIN: IE0000IPVB13)

A sub fund of Winton UCITS Funds ICAV (the "Fund"). The Fund is manufactured and managed by Winton Fund Management Ireland DAC.

PRIPs Manufacturer: Winton Fund Management Ireland DAC

Website: www.wintonucits.com; Telephone: +44(0)20 8576 5800

The Central Bank of Ireland is responsible for supervising Winton Fund Management Ireland DAC in relation to this Key Information Document ("KID").

This PRIIP is authorised in Ireland.

Winton Fund Management Ireland DAC is authorised in Ireland and regulated by the Central Bank of Ireland.

This document was last updated on 17/07/2026.

What is this Product?

Type

The Fund is a sub-fund of Winton UCITS Funds ICAV, an umbrella open-ended Irish collective asset-management vehicle authorised by the Central Bank of Ireland as a UCITS, and this KID describes the share class above and the Fund.

The Share Class is accumulating, meaning that any income generated by the Fund is reinvested.

The base currency of the Fund is USD and the currency of the Share Class is EUR.

For Share Classes denominated in currencies other than USD, the Fund will use financial derivatives to the extent reasonably possible to protect the Share Class against currency fluctuations to the USD. For Share Classes designated as 'Unhedged', the Fund will not attempt to protect the Shares Class against currency fluctuations to the USD.

Investment Objective and Policy

The investment objective of the Fund is to seek to achieve long term investment growth.

To achieve its objective, the Fund invests in a diversified portfolio of financial contracts (derivatives) that provide a return linked to the performance of certain share indices, tradeable debt (bonds), interest rates and currencies. The use of derivatives also allows the Fund to benefit from the decline in the value of such assets (short positions).

The Fund also invests in products known as 'structured financial instruments', a form of investment that provides a return linked to the performance of certain commodity markets.

The Fund's investments are determined according to a systematic trend-following strategy developed by Winton Capital Management Limited following a process that is based on statistical analysis of historical data.

The Fund will maintain a long bias exposure to global equity markets relative to the other asset classes.

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund.

The Fund is not managed in reference to a benchmark.

No income will be paid on your investment.

You may sell your investment on a daily basis.

Intended investor

The Fund is intended for sophisticated retail and institutional investors

Term

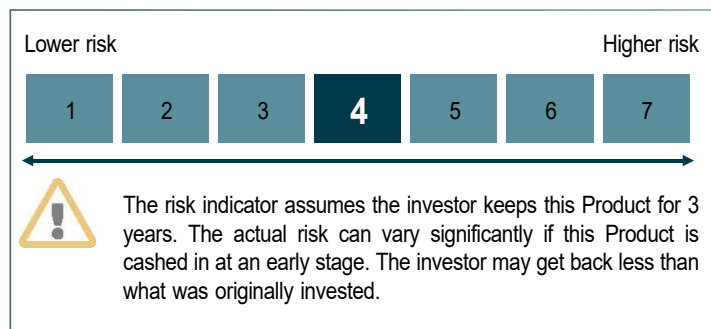

The Fund has no maturity date.

The Fund can be terminated if the net asset value is below USD 20 million or if a change in the economic or political situation would justify such liquidation if necessary in the interests of the shareholders.

Depository: The Bank of New York Mellon SA/NV, Dublin Branch

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. The risk category is not guaranteed and may change over time.

This product has been classified as 4 out of 7, which is a medium risk class.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus available at <https://www.wintonucits.com>.

For share classes designated as 'Unhedged': Be aware of currency risk. You will receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance Scenarios

The figures shown include all the costs of the product itself but may not include costs payable to an advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect the return of the investment.

Future market performance will determine the return from this product. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown in the table below are illustrations using the worst, average, and best performance of the product and/or the suitable benchmark/proxy over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 3 years		Investment of 10,000 EUR	
		If you exit after 1 year	If you exit after 3 years
Stress Scenario	What you might get back	4,753 EUR	4,630 EUR
	Average Return each year	-52.47 %	-22.64 %
Unfavourable Scenario	What you might get back	7,825 EUR	11,874 EUR
	Average Return each year	-21.75 %	5.89 %
Moderate Scenario	What you might get back	11,646 EUR	17,213 EUR
	Average Return each year	16.46 %	19.84 %
Favourable Scenario	What you might get back	17,088 EUR	24,349 EUR
	Average Return each year	70.87 %	34.53 %

The stress scenario shows what an investor might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/03/2017 and 31/03/2020.

Moderate scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/01/2021 and 31/01/2024.

Favourable scenario: This type of scenario occurred for an investment in the product and/or suitable benchmark/proxy between 31/12/2018 and 31/12/2021.

What happens if Winton Fund Management Ireland DAC is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary. In the event of the insolvency of Winton Fund Management Ireland DAC, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. As a shareholder in the Fund, there is no investor compensation or guarantee scheme applies to an investment in the Fund.

What are the costs

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that, in the first year, you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the 'moderate' scenario.

Recommended Holding Period: 3 years Investment of 10,000 EUR		If you exit after 1 year	If you exit after 3 years
Total Costs		169 EUR	712 EUR
Annual cost impact % *		1.7 %	1.5 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 21.37 % before costs and 19.84% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	No subscription fee applies.	0 EUR
Exit costs	No redemption fee applies.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.17% of the value of your investment per year. This is an estimate based on actual costs over the last year.	117 EUR
Transaction costs	0.52% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	52 EUR
Incidental costs taken under specific conditions		
Performance Fees	No performance fee applies.	0 EUR

How long should I hold it and can I take my money out early?

There is no recommended minimum holding period for this Fund but investors should not view this as a short term investment. However, you can redeem your investment without penalty at any time in accordance with the Fund's prospectus.

How can I complain?

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund.

The Fund is not managed in reference to a benchmark.

No income will be paid on your investment.

You may sell your investment on a daily basis.

Intended investor

The Fund is intended for sophisticated retail and institutional investors

Term

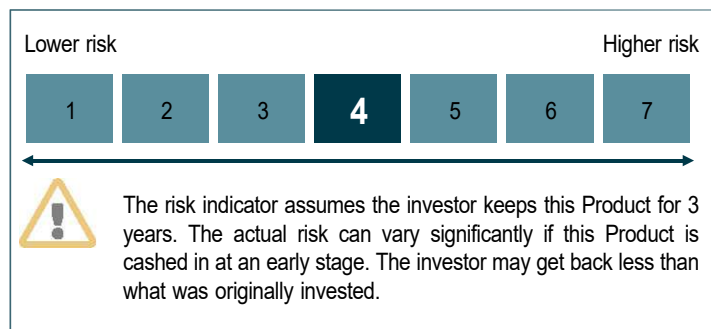

The Fund has no maturity date.

The Fund can be terminated if the net asset value is below USD 20 million or if a change in the economic or political situation would justify such liquidation if necessary in the interests of the shareholders.

Depository: The Bank of New York Mellon SA/NV, Dublin Branch

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. The risk category is not guaranteed and may change over time.

This product has been classified as 4 out of 7, which is a medium risk class.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus available at <https://www.wintonucits.com>.

For share classes designated as 'Unhedged': Be aware of currency risk. You will receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance Scenarios

The figures shown include all the costs of the product itself but may not include costs payable to an advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect the return of the investment.

Future market performance will determine the return from this product. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown in the table below are illustrations using the worst, average, and best performance of the product and/or the suitable benchmark/proxy over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 3 years		If you exit after 1 year	If you exit after 3 years
Investment of 10,000 EUR			
Stress Scenario	What you might get back	4,873 EUR	5,362 EUR
	Average Return each year	-51.27 %	-18.76 %
Unfavourable Scenario	What you might get back	7,476 EUR	10,361 EUR
	Average Return each year	-25.24 %	1.19 %
Moderate Scenario	What you might get back	11,319 EUR	15,283 EUR
	Average Return each year	13.19 %	15.19 %
Favourable Scenario	What you might get back	18,889 EUR	24,673 EUR
	Average Return each year	88.89 %	35.13 %

The stress scenario shows what an investor might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 18/03/2017 and 18/03/2020.

Moderate scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 22/08/2021 and 22/08/2024.

Favourable scenario: This type of scenario occurred for an investment in the product and/or suitable benchmark/proxy between 27/12/2018 and 27/12/2021.

What happens if Winton Fund Management Ireland DAC is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary. In the event of the insolvency of Winton Fund Management Ireland DAC, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. As a shareholder in the Fund, there is no investor compensation or guarantee scheme applies to an investment in the Fund.

What are the costs

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that, in the first year, you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the 'moderate' scenario.

Recommended Holding Period: 3 years Investment of 10,000 EUR		If you exit after 1 year	If you exit after 3 years
Total Costs		169 EUR	618 EUR
Annual cost impact % *		1.7 %	1.6 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 16.76 % before costs and 15.19% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	No subscription fee applies.	0 EUR
Exit costs	No redemption fee applies.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.17% of the value of your investment per year.	117 EUR

No income will be paid on your investment.

You may sell your investment on a daily basis.

Intended investor

The Fund is intended for sophisticated retail and institutional investors

Term

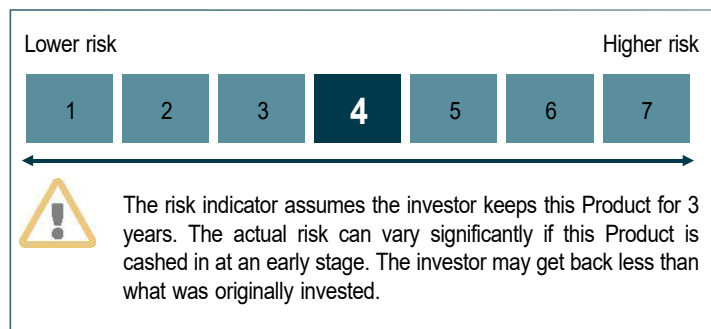

The Fund has no maturity date.

The Fund can be terminated if the net asset value is below USD 20 million or if a change in the economic or political situation would justify such liquidation if necessary in the interests of the shareholders.

Depository: The Bank of New York Mellon SA/NV, Dublin Branch

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. The risk category is not guaranteed and may change over time.

This product has been classified as 4 out of 7, which is a medium risk class.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus available at <https://www.wintonucits.com>.

For share classes designated as 'Unhedged': Be aware of currency risk. You will receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance Scenarios

The figures shown include all the costs of the product itself but may not include costs payable to an advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect the return of the investment.

Future market performance will determine the return from this product. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown in the table below are illustrations using the worst, average, and best performance of the product and/or the suitable benchmark/proxy over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 3 years Investment of 10,000 GBP		If you exit after 1 year	If you exit after 3 years
Stress Scenario	What you might get back	4,916 GBP	4,682 GBP
	Average Return each year	-50.84 %	-22.35 %
Unfavourable Scenario	What you might get back	7,792 GBP	12,285 GBP
	Average Return each year	-22.08 %	7.10 %
Moderate Scenario	What you might get back	11,541 GBP	17,071 GBP
	Average Return each year	15.41 %	19.51 %
Favourable Scenario	What you might get back	16,606 GBP	23,356 GBP
	Average Return each year	66.06 %	32.68 %

The stress scenario shows what an investor might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/03/2017 and 31/03/2020.

Moderate scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/03/2018 and 31/03/2021.

Favourable scenario: This type of scenario occurred for an investment in the product and/or suitable benchmark/proxy between 31/03/2019 and 31/03/2022.

What happens if Winton Fund Management Ireland DAC is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary. In the event of the insolvency of Winton Fund Management Ireland DAC, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. As a shareholder in the Fund, there is no investor compensation or guarantee scheme applies to an investment in the Fund.

What are the costs

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that, in the first year, you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the 'moderate' scenario.

Recommended Holding Period: 3 years Investment of 10,000 GBP		If you exit after 1 year	If you exit after 3 years
Total Costs		162 GBP	567 GBP
Annual cost impact % *		1.6 %	1.5 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 21.03 % before costs and 19.51% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	No subscription fee applies.	0 GBP
Exit costs	No redemption fee applies.	0 GBP
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.10% of the value of your investment per year. This is an estimate based on actual costs over the last year.	110 GBP
Transaction costs	0.52% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	52 GBP
Incidental costs taken under specific conditions		
Performance Fees	No performance fee applies.	0 GBP

How long should I hold it and can I take my money out early?

There is no recommended minimum holding period for this Fund but investors should not view this as a short term investment. However, you can redeem your investment without penalty at any time in accordance with the Fund's prospectus.

How can I complain?

Please contact the management company with any questions, comments or complaints by telephone, email or post:

Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Winton Trend Enhanced Global Equity (UCITS) Share Class: GBP I Shares (ISIN: IE000M0EYZ76)

A sub fund of Winton UCITS Funds ICAV (the "Fund"). The Fund is manufactured and managed by Winton Fund Management Ireland DAC.

PRIPs Manufacturer: Winton Fund Management Ireland DAC

Website: www.wintonucits.com; Telephone: +44(0)20 8576 5800

The Central Bank of Ireland is responsible for supervising Winton Fund Management Ireland DAC in relation to this Key Information Document ("KID").

This PRIIP is authorised in Ireland.

Winton Fund Management Ireland DAC is authorised in Ireland and regulated by the Central Bank of Ireland.

This document was last updated on 17/07/2026.

What is this Product?

Type

The Fund is a sub-fund of Winton UCITS Funds ICAV, an umbrella open-ended Irish collective asset-management vehicle authorised by the Central Bank of Ireland as a UCITS, and this KID describes the share class above and the Fund.

The Share Class is accumulating, meaning that any income generated by the Fund is reinvested.

The base currency of the Fund is USD and the currency of the Share Class is GBP. For Share Classes denominated in currencies other than USD, the Fund will use financial derivatives to the extent reasonably possible to protect the Share Class against currency fluctuations to the USD. For Share Classes designated as 'Unhedged', the Fund will not attempt to protect the Shares Class against currency fluctuations to the USD.

Investment Objective and Policy

The investment objective of the Fund is to seek to achieve long term investment growth.

To achieve its objective, the Fund invests in a diversified portfolio of financial contracts (derivatives) that provide a return linked to the performance of certain share indices, tradeable debt (bonds), interest rates and currencies. The use of derivatives also allows the Fund to benefit from the decline in the value of such assets (short positions).

The Fund also invests in products known as 'structured financial instruments', a form of investment that provides a return linked to the performance of certain commodity markets.

The Fund's investments are determined according to a systematic trend-following strategy developed by Winton Capital Management Limited following a process that is based on statistical analysis of historical data.

The Fund will maintain a long bias exposure to global equity markets relative to the other asset classes.

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund.

The Fund is not managed in reference to a benchmark.

No income will be paid on your investment.

You may sell your investment on a daily basis.

Intended investor

The Fund is intended for sophisticated retail and institutional investors

Term

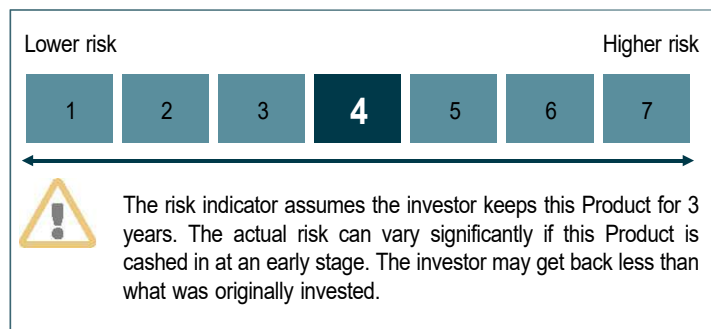

The Fund has no maturity date.

The Fund can be terminated if the net asset value is below USD 20 million or if a change in the economic or political situation would justify such liquidation if necessary in the interests of the shareholders.

Depository: The Bank of New York Mellon SA/NV, Dublin Branch

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. The risk category is not guaranteed and may change over time.

This product has been classified as 4 out of 7, which is a medium risk class.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus available at <https://www.wintonucits.com>.

For share classes designated as 'Unhedged': Be aware of currency risk. You will receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance Scenarios

The figures shown include all the costs of the product itself but may not include costs payable to an advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect the return of the investment.

Future market performance will determine the return from this product. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown in the table below are illustrations using the worst, average, and best performance of the product and/or the suitable benchmark/proxy over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 3 years Investment of 10,000 GBP		If you exit after 1 year	If you exit after 3 years
Stress Scenario	What you might get back	4,756 GBP	4,631 GBP
	Average Return each year	-52.44 %	-22.63 %
Unfavourable Scenario	What you might get back	7,825 GBP	11,874 GBP
	Average Return each year	-21.75 %	5.89 %
Moderate Scenario	What you might get back	11,664 GBP	17,448 GBP
	Average Return each year	16.64 %	20.39 %
Favourable Scenario	What you might get back	17,088 GBP	24,349 GBP
	Average Return each year	70.87 %	34.53 %

The stress scenario shows what an investor might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/03/2017 and 31/03/2020.

Moderate scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/10/2022 and 31/10/2025.

Favourable scenario: This type of scenario occurred for an investment in the product and/or suitable benchmark/proxy between 31/12/2018 and 31/12/2021.

What happens if Winton Fund Management Ireland DAC is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary. In the event of the insolvency of Winton Fund Management Ireland DAC, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. As a shareholder in the Fund, there is no investor compensation or guarantee scheme applies to an investment in the Fund.

What are the costs

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that, in the first year, you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the 'moderate' scenario.

Recommended Holding Period: 3 years Investment of 10,000 GBP		If you exit after 1 year	If you exit after 3 years
Total Costs		162 GBP	613 GBP
Annual cost impact % *		1.6 %	1.4 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 21.78 % before costs and 20.39% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	No subscription fee applies.	0 GBP
Exit costs	No redemption fee applies.	0 GBP
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.10% of the value of your investment per year. This is an estimate based on actual costs over the last year.	110 GBP
Transaction costs	0.52% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	52 GBP
Incidental costs taken under specific conditions		
Performance Fees	No performance fee applies.	0 GBP

How long should I hold it and can I take my money out early?

There is no recommended minimum holding period for this Fund but investors should not view this as a short term investment. However, you can redeem your investment without penalty at any time in accordance with the Fund's prospectus.

How can I complain?

Please contact the management company with any questions, comments or complaints by telephone, email or post:

No income will be paid on your investment.

You may sell your investment on a daily basis.

Intended investor

The Fund is intended for sophisticated retail and institutional investors

Term

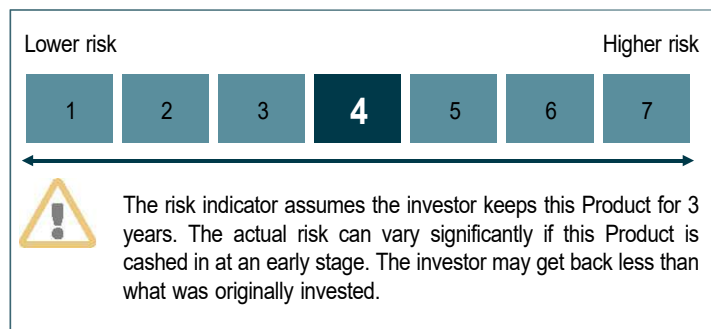

The Fund has no maturity date.

The Fund can be terminated if the net asset value is below USD 20 million or if a change in the economic or political situation would justify such liquidation if necessary in the interests of the shareholders.

Depository: The Bank of New York Mellon SA/NV, Dublin Branch

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. The risk category is not guaranteed and may change over time.

This product has been classified as 4 out of 7, which is a medium risk class.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus available at <https://www.wintonucits.com>.

For share classes designated as 'Unhedged': Be aware of currency risk. You will receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance Scenarios

The figures shown include all the costs of the product itself but may not include costs payable to an advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect the return of the investment.

Future market performance will determine the return from this product. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown in the table below are illustrations using the worst, average, and best performance of the product and/or the suitable benchmark/proxy over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 3 years		Investment of 10,000 USD	
		If you exit after 1 year	If you exit after 3 years
Stress Scenario	What you might get back	5,248 USD	5,725 USD
	Average Return each year	-47.52 %	-16.96 %
Unfavourable Scenario	What you might get back	7,476 USD	10,361 USD
	Average Return each year	-25.24 %	1.19 %
Moderate Scenario	What you might get back	11,587 USD	17,302 USD
	Average Return each year	15.87 %	20.05 %
Favourable Scenario	What you might get back	18,889 USD	24,673 USD
	Average Return each year	88.89 %	35.13 %

The stress scenario shows what an investor might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 18/03/2017 and 18/03/2020.

Moderate scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 02/04/2021 and 02/04/2024.

Favourable scenario: This type of scenario occurred for an investment in the product and/or suitable benchmark/proxy between 27/12/2018 and 27/12/2021.

What happens if Winton Fund Management Ireland DAC is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary. In the event of the insolvency of Winton Fund Management Ireland DAC, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. As a shareholder in the Fund, there is no investor compensation or guarantee scheme applies to an investment in the Fund.

What are the costs

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that, in the first year, you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the 'moderate' scenario.

Recommended Holding Period: 3 years Investment of 10,000 USD		If you exit after 1 year	If you exit after 3 years
Total Costs		162 USD	620 USD
Annual cost impact % *		1.6 %	1.7 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 21.72 % before costs and 20.05% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	No subscription fee applies.	0 USD
Exit costs	No redemption fee applies.	0 USD
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.10% of the value of your investment per year. This is an estimate based on actual costs over the last year.	110 USD
Transaction costs	0.52% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	52 USD
Incidental costs taken under specific conditions		
Performance Fees	No performance fee applies.	0 USD

How long should I hold it and can I take my money out early?

There is no recommended minimum holding period for this Fund but investors should not view this as a short term investment. However, you can redeem your investment without penalty at any time in accordance with the Fund's prospectus.

How can I complain?

Term

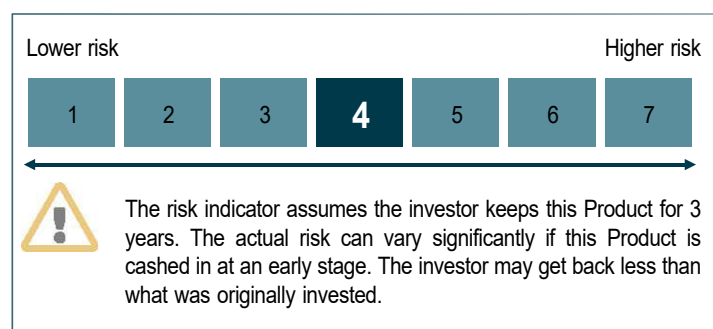

The Fund has no maturity date.

The Fund can be terminated if the net asset value is below USD 20 million or if a change in the economic or political situation would justify such liquidation if necessary in the interests of the shareholders.

Depository: The Bank of New York Mellon SA/NV, Dublin Branch

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. The risk category is not guaranteed and may change over time.

This product has been classified as 4 out of 7, which is a medium risk class.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus available at <https://www.wintonucits.com>.

For share classes designated as 'Unhedged': Be aware of currency risk. You will receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance Scenarios

The figures shown include all the costs of the product itself but may not include costs payable to an advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect the return of the investment.

Future market performance will determine the return from this product. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown in the table below are illustrations using the worst, average, and best performance of the product and/or the suitable benchmark/proxy over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 3 years		If you exit after 1 year	If you exit after 3 years
Investment of 10,000 USD			
Stress Scenario	What you might get back	4,873 USD	5,362 USD
	Average Return each year	-51.27 %	-18.76 %
Unfavourable Scenario	What you might get back	7,476 USD	10,361 USD
	Average Return each year	-25.24 %	1.19 %
Moderate Scenario	What you might get back	11,319 USD	15,283 USD
	Average Return each year	13.19 %	15.19 %
Favourable Scenario	What you might get back	18,889 USD	24,673 USD
	Average Return each year	88.89 %	35.13 %

The stress scenario shows what an investor might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 18/03/2017 and 18/03/2020.

Moderate scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 22/08/2021 and 22/08/2024.

Favourable scenario: This type of scenario occurred for an investment in the product and/or suitable benchmark/proxy between 27/12/2018 and 27/12/2021.

What happens if Winton Fund Management Ireland DAC is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary. In the event of the insolvency of Winton Fund Management Ireland DAC, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. As a shareholder in the Fund, there is no investor compensation or guarantee scheme applies to an investment in the Fund.

What are the costs

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that, in the first year, you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the 'moderate' scenario.

Recommended Holding Period: 3 years Investment of 10,000 USD		If you exit after 1 year	If you exit after 3 years
Total Costs		249 USD	911 USD
Annual cost impact % *		2.5 %	1.6 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 16.76 % before costs and 15.19% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	No subscription fee applies.	0 USD
Exit costs	No redemption fee applies.	0 USD
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.97% of the value of your investment per year.	197 USD
Transaction costs	0.52% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	52 USD
Incidental costs taken under specific conditions		
Performance Fees	No performance fee applies.	0 USD

How long should I hold it and can I take my money out early?

There is no recommended minimum holding period for this Fund but investors should not view this as a short term investment. However, you can redeem your investment without penalty at any time in accordance with the Fund's prospectus.

How can I complain?

This PRIIP is authorised in Ireland.

Winton Fund Management Ireland DAC is authorised in Ireland and regulated by the Central Bank of Ireland.

This document was last updated on 17/07/2026.

What is this Product?

Type

The Fund is a sub-fund of Winton UCITS Funds ICAV, an umbrella open-ended Irish collective asset-management vehicle authorised by the Central Bank of Ireland as a UCITS, and this KID describes the share class above and the Fund.

The Share Class is accumulating, meaning that any income generated by the Fund is reinvested.

The base currency of the Fund is USD and the currency of the Share Class is USD.

For Share Classes denominated in currencies other than USD, the Fund will use financial derivatives to the extent reasonably possible to protect the Share Class against currency fluctuations to the USD. For Share Classes designated as 'Unhedged', the Fund will not attempt to protect the Shares Class against currency fluctuations to the USD.

Investment Objective and Policy

The investment objective of the Fund is to seek to achieve long term investment growth.

To achieve its objective, the Fund invests in a diversified portfolio of financial contracts (derivatives) that provide a return linked to the performance of certain share indices, tradeable debt (bonds), interest rates and currencies. The use of derivatives also allows the Fund to benefit from the decline in the value of such assets (short positions).

The Fund also invests in products known as 'structured financial instruments', a form of investment that provides a return linked to the performance of certain commodity markets.

The Fund's investments are determined according to a systematic trend-following strategy developed by Winton Capital Management Limited following a process that is based on statistical analysis of historical data.

The Fund will maintain a long bias exposure to global equity markets relative to the other asset classes.

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund.

The Fund is not managed in reference to a benchmark.

No income will be paid on your investment.

You may sell your investment on a daily basis.

Intended investor

The Fund is intended for sophisticated retail and institutional investors

Term

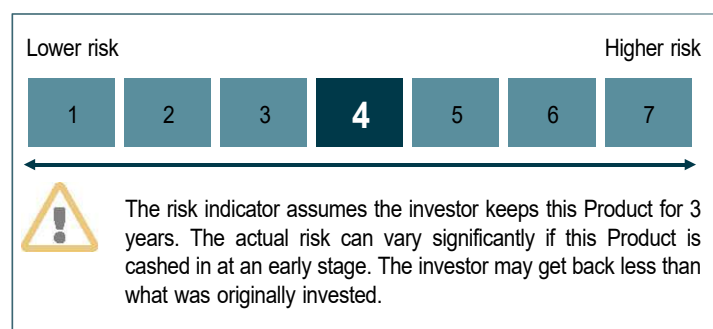

The Fund has no maturity date.

The Fund can be terminated if the net asset value is below USD 20 million or if a change in the economic or political situation would justify such liquidation if necessary in the interests of the shareholders.

Depository: The Bank of New York Mellon SA/NV, Dublin Branch

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. The risk category is not guaranteed and may change over time.

This product has been classified as 4 out of 7, which is a medium risk class.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus available at <https://www.wintonucits.com>.

For share classes designated as 'Unhedged': Be aware of currency risk. You will receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance Scenarios

The figures shown include all the costs of the product itself but may not include costs payable to an advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect the return of the investment.

Future market performance will determine the return from this product. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown in the table below are illustrations using the worst, average, and best performance of the product and/or the suitable benchmark/proxy over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 3 years		Investment of 10,000 USD	
		If you exit after 1 year	If you exit after 3 years
Stress Scenario	What you might get back	4,756 USD	4,631 USD
	Average Return each year	-52.44 %	-22.63 %
Unfavourable Scenario	What you might get back	7,825 USD	11,874 USD
	Average Return each year	-21.75 %	5.89 %
Moderate Scenario	What you might get back	11,664 USD	17,461 USD
	Average Return each year	16.64 %	20.42 %
Favourable Scenario	What you might get back	17,088 USD	24,349 USD
	Average Return each year	70.87 %	34.53 %

The stress scenario shows what an investor might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/03/2017 and 31/03/2020.

Moderate scenario: This type of scenario occurred for an investment in the product and/or a suitable benchmark/proxy between 31/10/2022 and 31/10/2025.

Favourable scenario: This type of scenario occurred for an investment in the product and/or suitable benchmark/proxy between 31/12/2018 and 31/12/2021.

What happens if Winton Fund Management Ireland DAC is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary. In the event of the insolvency of Winton Fund Management Ireland DAC, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. As a shareholder in the Fund, there is no investor compensation or guarantee scheme applies to an investment in the Fund.

What are the costs

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that, in the first year, you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the 'moderate' scenario.

Recommended Holding Period: 3 years Investment of 10,000 USD		If you exit after 1 year	If you exit after 3 years
Total Costs		169 USD	639 USD
Annual cost impact % *		1.7 %	1.4 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 21.85 % before costs and 20.42% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	No subscription fee applies.	0 USD
Exit costs	No redemption fee applies.	0 USD
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.17% of the value of your investment per year. This is an estimate based on actual costs over the last year.	117 USD
Transaction costs	0.52% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	52 USD
Incidental costs taken under specific conditions		
Performance Fees	No performance fee applies.	0 USD

How long should I hold it and can I take my money out early?

There is no recommended minimum holding period for this Fund but investors should not view this as a short term investment. However, you can redeem your investment without penalty at any time in accordance with the Fund's prospectus.
